i4 Epi Lumin™

For users requiring a multi-purpose microscope for expanding health services, LW Scientific introduces the new i4 Epi Lumin™ Fluorescence microscope. With integrated LED technology for both bright field and epifluorescence microscopy, the i4 Epi Lumin™ offers superior clarity and crisp imaging—all at a price that allows even labs on a limited budget to benefit from the latest technological advances.

The Lumin™ epifluorescence module converts our standard i4 microscope to a fully functional epifluorescence microscope. The resulting images rival those obtained from traditional, expensive epifluorescence systems.
